ENVEED

Our Mission

Our mission at ENVEED is to provide a high-quality, effective and reliable family of CBD products with customer care to match. We've put together a team of professionals to create the purest, most bio-available products on the market. Our products are independently lab tested by a third party to ensure the highest standards in the industry and to ensure that we are providing a quality product each and every time. Our unique ability to efficiently scale both upwards and downwards to align with each customer's needs, allows us to offer the most comprehensive and accessible raw goods and white/private label solutions in the industry.

Our high-quality ingredients are just one of the reasons that ENVEED has the reputation of having the best overall quality products, best-tasting products and the highest product success rates in the industry.

GMP REGISTERED
Dietary Supplements

ENVEED

Who We Are

Located in Southern California, ENVEED manufactures high quality third-party, lab-tested products for over 50 private label CBD brands nationwide; some of which are the largest CBD brands in the USA.

We take pride in putting ourselves in our customers shoes. All products are made under strict guidelines for each customer's needs. When we take you on as a new customer, we create a unique file just for you. In your file, we create and build your custom SOP's, batch production records, formulation calculators, recipes, invoices, packaging specifications, label designs, and more.

Why Choose Us?

- Knowledgeable staff
- Industry expertise
- Outstanding customer service
- Wide array of raw materials available
- Customizable private label options
- Flexible MOQs
- Quick turnaround times
- Top to bottom supply chain
- High quality control standards
- Certified facilities

Market Expansion

"CBD Market Could Reach \$20 Billion By 2024, Says New Study Affecting industries as diverse as cosmetics, food & beverage and pharmaceuticals, the exploding CBD (cannabidiol) market has generated considerable headlines [...] The latest one, by leading cannabis researchers BDS Analytics and Arcview Market Research, projects that the collective market for CBD sales in the U.S. will surpass \$20 billion by 2024 [...]"

"BDS Analytics predicts that the majority of CBD product sales will soon occur in general retail stores instead of cannabis dispensaries. When you consider how cannabis has become increasingly integrated into mainstream society, as represented by the number of states that have legalized recreational or medical markets (33 and D.C. for recreational use and 10 states plus D.C. for adult use), the BDS prognostication makes perfect sense."

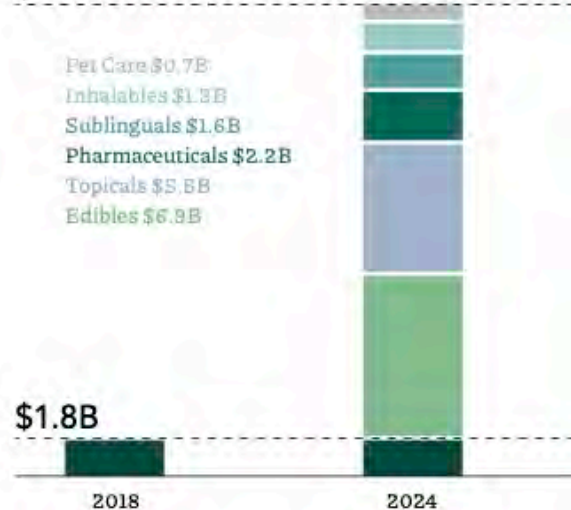

"Other findings from the study include:

- CBD product sales in dispensaries since 2014 have grown at an even faster rate than overall sales in dispensaries;
- 66 percent of hemp-derived CBD consumers in the U.S. agree with full federal legalization of cannabis, with 90 percent believing that marijuana has medical benefits; and
- CBD consumers are an average age of 40, have higher education, and are more likely than non-consumers to be employed full time."

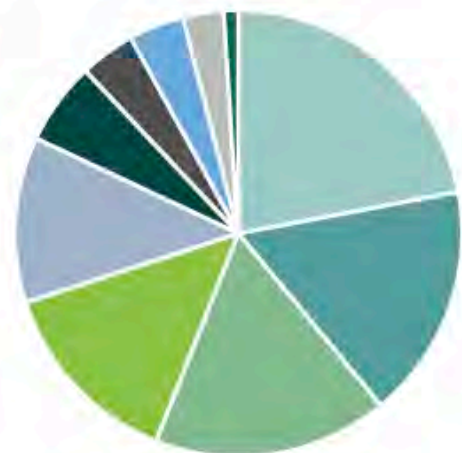

-Forbes

ENVEED

Private Labeling

There has never been a better time to get into the CBD industry! When you Private Label with ENVEED, you gain access to our proprietary production processes, our industry-leading expertise, and our world-class customer service.

Our in house team is capable of handling all of your procurement and fulfillment needs. We are continually dedicated to assisting you in building your own CBD brand(s).

Ultimately, we fully align our interests with yours - when you grow, we grow. It's that simple.

With order sizes from 100 units per SKU to 1,000,000+, we have built our processes to scale efficiently and effectively to meet every partner's needs.

- 100% American Made
- Highest Quality RAW Materials
- Top Quality Assurance
- World-Class Customer Service
- Quick Order Fulfillment
- cGMP Compliant
- 0.0% THC
- Dozens of Specialty Flavors Available
- Custom Formulation Available
- Wide Array of Standard Packaging Options
- Packaging Upgrades and Custom Packing Available
- Drop Shipping Options Available
- 3rd Party Testing Available Upon Request

ENVEED

The Process

How it Works

Choose Your Products

We are known worldwide for our consistently dosed, mouth watering CBD gummies. However, we do have many other great products. From award winning topicals, to sub-linguals and beyond, we are your one stop shop for Private Label

Order Customization

Get personalized with packaging and label options. Glass tincture bottles come in your choice of color & size, with a locking rubber dropper top. The sky's the limit when it comes to order customization.

Upload Your Assets

How do you want to represent your brand?
High Res Logo, Label Artwork, sales images etc.

ENVEED

CBD-INFUSED

Gummies

We are currently one the largest CBD gummy manufacturers in the United States.

Our default CBD gummy packaging comes with the option of a slim pouch design, complete with zip-seal at the top.

The locking seal retains freshness for your customer in between doses, extending its shelf life and reducing package leakage.

We offer a variety of bag and bottle labels, colorations and sizes. We also offer THC free and full spectrum CBD options!

Standard Flavors:

Blue Raspberry Rings
Cherry Rings
Green Apple Rings
Peach Rings
Sour Neon Rings
Watermelon Rings
Sour Neon Bears
Sour Neon Worms
Sour Gummy Bears

Custom Supplement blends:

Terpenes
Vegan
Vitamin C
Melatonin
And More!!

Edibles

Ingredients

10 mg, 25 mg, or custom (based on order volume).

Individual gummy ingredients are available upon request.

Serving Size:

A serving 1 piece (gummy), the amount of servings would be based on the quantity of gummies per container.

Standard Packaging

All gummies are customizable with special options. Choose from pouches or bottles. Reach out to our Sales rep to learn more.

*available as upgrade formula

For purposes of representations, ENVEED, when speaking to the above terms, is defining every hemp oil batch as tested prior to release by its Quality Control Laboratory, employing a qualified test method based on HPLC-DAD (Diode-Array Detector) equipment. Certificates of Internal Analysis are provided with each order confirming the absence of detectable THC from such equipment. Terms used not meant in the literal context. +/-ranges are associated with the testing equipment. FDA Disclaimer: Any statements made have not been evaluated by the Food and Drug Administration. No products we produce, manufacture, market, or distribute are intended to diagnose, treat, cure or prevent any disease. Keep out of reach of children. Consult your healthcare provider before taking if you are pregnant or nursing or have any other medical concerns.

ENVEED

CBD-INFUSED

Tinctures

Our CBD tinctures come pre-packaged in white, blue, brown or black bottles, with the option to add labeling to your order.

An easy-to-use dropper allows your customers to measure the dosage they desire, while a locking mechanism at the top stops leakage from taking place in between uses.

Other bottle/dropper colors are available upon request.

Pain Patch

Our Hemp Oil Extract 96-hour topical skin patch contains 60mg of hemp-derived phytocannabinoids, is naturally pure and additive-free. Our reservoir design patch delivers up to 96 hours of continuous relief.

Hypoallergenic and waterproof they can be worn while showering. Formulated with all-natural ingredients, they contain no chemical enhancers.

Our innovative reservoir design provides a barrier between the pain-relieving ingredients and the pressure-sensitive adhesive to prevent the oils and natural enhancers in the pad from mingling with adhesive materials.

Ingredients

Phytocannabinoid Rich Hemp Extract (THC-Free), Coconut Oil, Soy Lecithin, Aloe Vera Polysaccharides, Linoleic and Oleic Acid, Sweet Almond Oil, Red Palm Oil, Shea Butter, Sunflower Oil Extract, Persea Gratissima Oil, Eucalyptus Oil, Sage and Citrus Essential Oils.

Toner

Using a toner is an important step in any serious skin care regime-- toners with alpha hydroxy acids (AHAs), make toning impact even more beneficial.

Toning helps the skin by balancing the pH, minimizing the look of pores, removing residuals missed during cleansing and preparing the skin to receive the serums / moisturizers to come.

Toners formulated with AHAs help to re-texturize, slough and soften the skin, giving it a refreshed and refined appearance.

Though the organic aloe base is soothing, with only the finest natural fruit, sugar and lactic acids used, this toner may not be suited for those with extra sensitive skin.

Balanced for the skin's pH between 3.5 to 4.2.

Ingredients

Organic Aloe Leaf Juice, Glycerin, Phenoxyethanol, Organic Sugar Cane Extract, Organic Bilberry Fruit Extract, Organic Sugar Maple Extract, Organic Orange Peel Extract, Organic Lemon Peel Extract, Organic Cranberry Fruit Extract, Malic Acid, Tartaric Acid, Glycolic Acid, Lactic Acid, Citric Acid, Organic White Willow Bark Extract, Tea Tree Leaf Oil, Polysorbate 20, Organic Alcohol, Tetrasodium Glutamate Diacetate.

*available as upgrade formula

For purposes of representations, ENVEED, when speaking to the above terms, is defining every hemp oil batch as tested prior to release by its Quality Control Laboratory, employing a qualified test method based on HPLC-DAD (Diode-Array Detector) equipment. Inhalables

For purposes of representations, ENVEED, when speaking to the above terms, is defining every hemp oil batch as tested prior to release by its Quality Control Laboratory, employing a qualified test method based on HPLC-DAD (Diode-Array Detector) equipment. Certificates of Internal Analysis are provided with each order confirming the absence of detectable THC from such equipment. Terms used not meant in the literal context. +/-ranges are associated with the testing equipment. FDA Disclaimer: Any statements made have not been evaluated by the Food and Drug Administration. No products we produce, manufacture, market, or distribute are intended to diagnose, treat, cure or prevent any disease. Keep out of reach of children. Consult your healthcare provider before taking if you are pregnant or nursing or have any other medical concerns.

Raw Product Glossary

Broad Spectrum Distillate:

Our Broad Spectrum Distillate is a high quality raw extract with a terrific cannabinoid profile while having zero THC. Broad Spectrum Distillate is being used in everything - whether it be topically, orally, or sub-lingually, this versatile form of CBD is adding value to companies' product lines every day.

Full Spectrum Distillate:

Our Full Spectrum Distillate is a high quality raw extract with a terrific cannabinoid profile while having federally compliant THC levels (<0.3%).

CBD Isolate:

Opposed to a Full Spectrum or Broad Spectrum distillate, that has many of the other compounds from the hemp plant, such as THC, fats, lipids, terpenes, etc... CBD Isolate has had all of those other compounds removed, leaving you with the purest, highest grade CBD extract available. All of our Isolate is 99+% in purity.

Broad Spectrum Powder:

Broad Spectrum CBD Powder is natural and US hemp derived, containing various cannabinoids found naturally in the industrial hemp plant. At a 25% active potency, our Broad Spectrum Powder is as easy to use as isolate and is perfect for drink mixes, stick packs, gummies, and much more! Customizable options available upon request.

Delta8 Distillate:

Delta-8 Distillate is a mildly psychoactive cannabinoid found only in trace amounts in the hemp plant. Delta 8 is a cannabinoid and is just now starting to catch the industry's attention due to its ability to act similar to CBD, but with much more noticeable effects. Like CBD, Delta 8 is less psychoactive- meaning it is physically sedative rather than mentally sedative.

Nano Broad Spectrum Liquid:

Our Nano Broad Spectrum is naturally emulsified material to promote easy absorption while still maintaining potency. At a 20% active CBD content, this product is widely used for hydrophilic blends and maintains a wide profile of cannabinoids since it's derived from Broad Spectrum Distillate.

Raw Product Glossary (continued)

Nano Isolate Liquid:

Our Nano Isolate is naturally emulsified material to promote easy absorption while still maintaining potency. Nano-emulsification spreads out molecules so it makes material more bio-available & harder to develop a tolerance. At a 20% active CBD content, this product is widely used for hydrophilic blends and is especially great for carbonated beverages.

Cannabinol CBN Isolate:

CBN was the first naturally occurring cannabinoid to be isolated in its pure form. CBN is a non-intoxicating compound that is best known as the cannabinoid created when THC ages. CBN isolate is currently being used for infusion into a range of products, including topicals, tinctures and concentrates.

Cannabigerol Isolate CBG Isolate:

A large amount of hemp, about 10-15 times the amount needed for CBD extraction, is needed for CBG purity extraction because of the lower concentration of CBG. Consequently, this raises the cost of CBG isolate quite drastically. Over time as hemp and cannabis strains evolve and become more prevalent, the cost of CBG will likely decrease.

Crystal Resistant Distillate (CRD):

Crystal-resistant distillate (CRD) is a special type of CBD extract that keeps the CBD profile under 60% to make sure the material does not crystallize. This product is perfect for vapes, pens, and any other inhalables.

Services

Lab Testing

Lab testing is available from a third party laboratory, certifying potency and purity.

Standard potency test is available for a cost of \$80 per sku.

A full panel test is available for a cost of \$770 per sku.

*lab prices are subject to change

Co-Packing

Some of our customers have bulk products that have been custom formulated or sourced through a supplier or extractor. We offer packaging, labeling, shipping and high volume capacity.

Drop Shipping

This is one of the most popular ways to build an eCommerce store. No need to stock inventory (in-house) or manage product shipments, you can focus on marketing and building up an audience for your store. This is the most affordable way to launch a new eCommerce website.
